(54) FM MULTIPLEX SIGNAL RECEIVER

(57)Abstract:

PROBLEM TO BE SOLVED: To display the time of reception end corresponding to the contents of completely received page data concerning program data to be transmitted by FM multiplex broadcasting.

SOLUTION: The FM multiplex signal received by an antenna 12 and FM demodulated by an FM tuner part 14 is inputted to an FM multiplex decode part 15 and a base band signal is extracted. Based on the extracted base band signal, a CPU 40 at a personal computer 120 reconstitutes the program data. In that case, each time the page data are completely received, the time of reception end is possessed from a timer 50 and the contents of page data and the time of reception end are correspondently stored in a memory part 44. The CPU 40 correspondently displays the page data and the reception end time onto a display part 42.
